RF-GENERATOR

- Rated RF power output: 300 Watts
- Frequency: 13.560 MHz ± 100ppm
- Adjustable RF power range:
  0 – 300 Watts, continuous
- Generator can be pulsed:
  Min. on-time: 5µs
- Impedance: 50 Ohms
- RF stability: less than 5 %
- Load mismatch protection (built-in) against open output and short circuit
- Regulation tolerance load:
  VSWR = 1,2
- Capable of switching power to 100% immediately
- Mains input: 88 - 264 VAC / 47 – 63 Hz
- Mains power consumption: max 580 Watts
- Remote interface connector intended for:
  - RF switch ON/OFF
  - RF power adjustment (0...10V = 0...100%)
- RF output: N connector
- Power connector: for external power supply
- Weight: approx. 18 kg (generator)
- 19-inch rack

Applications:
- Low pressure plasma
- Dielectric heating
